SKILLS

- **Frontend:** JavaScript (ES6+), TypeScript, React, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, SASS (SCSS), API Integration
- **Backend:** Node.js, Express.js, MongoDB, MySQL, Python, Flask
- **Tools & Practices:** Git, GitHub, Responsive Web Design, NPM, Vite, Jest, REST APIs, CI/CD (Vercel, Netlify), Performance Optimization, SEO, Accessibility, Data Structures & Algorithms

EXPERIENCE

Software Engineer

Genpact

Oct 2024 - Dec 2025

Bangalore, Karnataka, India

- Built real-time dashboard (React, Hooks, Redux) with dynamic filters and charts utilizing polling and optimized rendering and reduced reporting delays by 85%.
- Designed and developed an end-to-end Python-based ETL code conversion tool with a React and Tailwind CSS frontend, integrated with the backend to automate migration-ready file generation, cutting manual effort by 70%.
- Contributed to the enterprise-level data migration of GE Vernova, supporting the migration of over 100 components from Talend to Databricks, improving workflow efficiency, scalability, and operational insights.

Software Engineer Intern

Genpact

Feb 2024 - Jul 2024

Bangalore, Karnataka, India

- Built React + TypeScript dashboards to visualize 2M+ SPARCS records (filters, charts), improving healthcare analytics and supporting data-driven decision-making.
- Built a full-stack invoice discrepancy detection tool with a React and TypeScript frontend, integrating a Python/AI backend to parse batch PDF uploads, apply fuzzy matching against database records, and use OpenAI APIs for verification, enabling users to review results and export discrepancies as CSV.

Web Developer

Codecrux Dev

Sep 2021 - May 2023

New Delhi, Delhi, India

- Developed the Camouflage (apps.shopify.com/camouflage) admin panel using Next.js, React, and TypeScript, building reusable UI components and delivering a streamlined interface for merchant configuration and app management.
- Implemented dynamic theme detection, custom swatch components, and storefront compatibility logic to ensure responsive UI behavior and resolve conflicts with Shopify themes and third-party apps.
- Built TypeScript-based REST APIs and automated validation services using targeted web scraping to support onboarding flows, improve configuration error detection, and contribute to a 5-star rating with 170+ positive Shopify App Store reviews.

PROJECTS

Highlight-Plus (npmjs.com/package/highlight-plus)

Feb 2025 - Feb 2025

- Engineered and published an open-source reusable React + TypeScript component extending highlight.js & react-highlight for customizable word-level syntax highlighting, improving code readability and developer experience.
- Implemented flexible CSS color-format support (HEX, RGB, RGBA, HSL, HSLA, named colors); achieved 379 downloads on NPM, demonstrating adoption and real-world utility.

EDUCATION

Master of Computer Applications

National Institute of Technology, Kurukshetra

2021 - 2024

9.13 CGPA

Bachelor of Science (Computer Science)

University of Delhi, Delhi

2018 - 2021

9.05 CGPA

ACHIEVEMENTS

- Competitive Programming: Leetcode Knight badge - 1884 rating
- Open-source contributor with 198 rank and 10 merged pull requests in Girl Script Summer of Code 2023.
- 2726 reputation on Stack Overflow
