PROFESSIONAL SUMMARY

Full-Stack Software Engineer, skilled in building scalable web applications using React, Node.js, and Express. Experienced in developing responsive user interfaces, designing robust APIs, and delivering end-to-end solutions with clean, maintainable code.

SKILLS

- **Frontend Technologies**
JavaScript (ES6+), React, Redux, HTML5, CSS3, Tailwind CSS, Material UI, Chakra UI, Bootstrap, SCSS, jQuery, AJAX, Responsive Design, DOM Manipulation, API Integration, Animations
- **Backend Technologies**
Node.js, Express.js, RESTful API Design, Authentication (JWT), Middleware, Asynchronous Programming, MongoDB, PostgreSQL, Firebase, Web Scraping (Puppeteer), Error Handling
- **Development Tools & Platforms**
Git, GitHub, NPM, Visual Studio Code, Postman, Redux DevTools, React Developer Tools, Chrome DevTools, Insomnia
- **Soft Skills**
Problem-Solving, Adaptability, Collaboration, Critical Thinking, Time Management, Effective Communication, Leadership

EXPERIENCE

Software Engineer — Genpact | Bangalore, Karnataka, India Oct 2024 - Present

- Developed interactive dashboards using React to visualize real-time data migration progress from Greenplum to Databricks, enhancing visibility for stakeholders and project managers.
- Implemented streamlined data lineage views by filtering and transforming complex Orion outputs, enabling developers to trace job and table hierarchies 30% more efficiently during migration and debugging.
- Designed RESTful APIs using Node.js and Express.js to compute and provide migration progress by aggregating data from Databricks and Greenplum.
- Automated cross-domain data impact analysis by parsing production notebooks to extract table dependencies, enabling informed decisions to safely decommission tables from Greenplum without disrupting downstream processes.

Software Development Engineer Intern — Genpact | Bangalore, Karnataka, India Feb 2024 - Jul 2024

- Delivered a scalable cloud-based healthcare analytics system, automating ETL workflows and business insights generation, with predictive modeling for patient stay duration.
- Engineered an AI-powered tool to detect data discrepancies in PDF invoices using NLP techniques and OpenAI API.

Web Developer — Codecrux Dev | New Delhi, Delhi, India Sep 2021 - May 2023

- Built the entire app interface for Camouflage (apps.shopify.com/camouflage) from scratch using Next.js, implementing features like automatic theme detection and swatch configuration for seamless Shopify integration.
- Extended compatibility with all free Shopify 2.0 themes, contributing to a 5-star rating and over 170 positive reviews.

EDUCATION

Master of Computer Applications — National Institute of Technology Kurukshetra 2021 - 2024

Bachelor of Science (Hons.) in Computer Science — Delhi University 2018 - 2021

PROJECTS

Highlight-Plus — React, TypeScript, NPM Jul 2023 - Aug 2023

- Built and published a TypeScript-compatible React component ([npmjs.com/package/highlight-plus](https://www.npmjs.com/package/highlight-plus)) on top of react-highlight for syntax highlighting with customizable text emphasis.
- Enhanced package to support multiple languages, theme options, and seamless integration into React-based applications.

ACHIEVEMENTS

- Knight badge with 1884 rating on Leetcode (leetcode.com/prustagi/)
- 198 rank with 10 merged pull requests in Girl Script Summer of Code 2023 (gssoc.girlscript.tech/leaderboard)
